DETAILED ACTION

1. This application is in response to a request for continued examination filed February 5, 2004. Claims 1-27 are presented for further consideration.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-6, 8-9, 11-21, 23-24, and 26-27 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5, 7, 13-14, 17-18, 21-26, 28, 34-35, and 38-39 of copending Application No. 09/649,946. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter claimed in the instant application is fully disclosed the co-pending application.

4. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The subject matter of the instant application is covered by the co-pending application since they are both claiming common subject matter as follows:

<p><i>The distinctions would have been obvious because the claimed subject matter is functionally equivalent.</i></p>	
<p>Claims 3 and 18: The method wherein the processing step is initiated in response to another user input approving use of the modified rule.</p> <p><i>The distinctions would have been obvious because the claimed subject matter is functionally equivalent.</i></p>	<p>Claims 3 and 24: The method wherein the processing step is initiated in response to another user input approving use of the rule.</p>

Allowable Subject Matter

5. Claims 7, 10, 22, and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
